Casement windows and doors

NC 50 STH

NC 50 STH is an ideal system, very lightweight with great sealing performance. The thermal break enables high thermal insulation and energy saving all within just 50 mm of depth. NC 50 STH can enhance various housing types that require small – medium lighting.

Double side-hung casement

Single side-hung casement

Tilt and turn

Bottom-hung

Horizontal pivot casement

Vertical pivot casement

Top hung casement

Tilt-and-slide

Advantages

- Wide range of finishes
- Easy maintenance
- High-level design
- Various opening typologies
- Minimal amount of space
- Maximum thermal insulation
- Maximum acoustic insulation

Technical features

Base dimensions:

from 50 to 60 mm

Air-water tightness:

open joint (casement windows and doors);
double rabbet gasket (entrance doors)

Glass thickness:

from 4 to 42 mm

Aesthetic lines:

Piana, Sagomata, Classica, Raggiata, Stondata, Ferro,
A Scomparsa, Tonda,

Certified performances

Water tightness EN 1027 - EN 12208

The METRA window or door has not had any seepage of water even with a wind pressure equal to a speed of 111,54 Km/h (600Pa).

Air pressure applied Km/h	(0Pa)	(50Pa)	(100Pa)	(150Pa)	(200Pa)	(250Pa)	(300Pa)	(450Pa)	(600Pa)	(900Pa)
Class achieved	1A	2A	3A	4A	5A	6A	7A	8A	9A	E900

Capacity of the window or door to block seepage of water when it is struck by a water flow and there is a pressure difference between the internal and external side.

Air permeability EN 1026 - EN 12207

The METRA window or door was subjected to a wind pressure equal to a speed of 111,54 Km/h (600Pa) and passed the test with positive results.

Air pressure applied Class achieved	(150Pa)	(300Pa)	(600Pa)	(600Pa)
	1	2	3	4

Characteristic of a closed vent to let air pass through when the internal and external pressures are mutually different; the smaller the volume dispersed, the greater the window or door quality.

Resistance to wind load EN 12211 - EN 12210

The METRA window or door was subjected to a wind pressure equal to a speed of 203,6 Km/h (2000Pa) non passed the test without damage or permanent deformations.

Air pressure applied With deflection Class achieved	(400Pa)	(800Pa)	(1200Pa)	(1600Pa)	(2000Pa)	(>2000Pa)
	A (1/150)		B (1/200)		C (1/300)	E _{xxx}
	1	2	3	4	5	E _{xxx}

Capacity of a window or door subjected to high pressure and/or suction, such as those caused by wind, to remain within admissible deformation limits and to conserve its initial properties so as to ensure protection and safety to the users.

Soundproofing power EN ISO 140-3, EN ISO 717-1

METRA windows and doors are able to cut out airborne noise from the outside up to 46 dB.

Up to 46 dB

Capacity of a window and door to attenuate external noise.

Thermal transmittance

The METRA window and door comply with the energy saving standards.

The heat transmission rate U is the heat flow which goes through the window or door according to m² of surface and for each degree of difference in temperature between exterior and interior. The unit of thermic transmission measurement is W/m²K.

Burglar resistance EN 1627 - EN 1630

METRA windows and doors effectively resist intruders attempting to get inside.

Resistance class
WK1
WK2
WK3

Capacity of a window and door to resist a violent intrusion attempt following application of a physical force with the help of tools.

Technology

- 1 - Frame
- 2 - Sash
- 3 - Glazing bead available in different sizes depending on glass thickness
- 4 - Insulating glass with one air space (double glazing) or two air spaces (triple glazing)
- 5 - EPDM glazing gasket
- 6 - Insulating bars made of polyamide 6.6 reinforced with 25% fibreglass
- 7 - "Open joint" central tightness gasket
- 8 - EPDM internal rabbet gasket
